- ❖ This report provides information about the treatment completion rates experienced by AOD treatment clients, including detailed characteristics about clients who did and who did not complete their treatment.
- ❖ The data were collected during client discharges from AOD treatment that occurred during the selected reporting period and is based on service counts ("N") and not unique clients. This may result in multiple counts for the same client if they had more than one treatment discharge during the selected reporting period.
- ❖ This report excludes data for clients whose discharges were due either to the client's death or incarceration.
- ❖ Use of the various report filters may yield small cell sizes which will undermine the report's usefulness since small changes in frequency produce large changes in percentages. Smaller cell sizes also increase the potential risk of communicating protected health information (PHI).
- ❖ Note: The "Fiscal Year" filter selection is not used by this report despite being listed above.

### \*\*\*Important\*\*\*

Protect all CalOMS reports as PHI. At a minimum, such protections must comply with the privacy and security requirements defined in the rules of the Health Insurance Portability and Accountability Act (HIPAA) and Confidentiality of Alcohol and Drug Abuse Patient Records (42 CFR Part 2).

#### Notes:

(1) - The following data does not include clients who left before treatment completion due to death or incarceration.
